Abstract (en)
The invention relates to a motorcyclist protection system, of the type of those formed by a continuous lower rail (5) closing the space under an upper rail (3), fixed, through spacers (2), to posts (1) of anchorage to the ground. According to this system, the continuous lower rail (5) is assembled through post arms (6) and/or intermediate arms (7); each post arm (6) is formed by a single part made of sheet metal with a stepped profile having an upper expansion or pin through which each post arm (6) is directly fixed to the corresponding post (1), without having to loosen or tighten any part of the already installed barrier.
