Abstract (en)

[origin: EP2395196A2] The attachment door (1) has a sliding wing (2) with four frame profiles (4) formed to a rectangle form, which is adjustably mounted over two roller bearings on a roller rail. The roller rail is provided underneath to the sliding wing. The one or both roller bearings (12) has a roller holder and a roller pivoted mounted at the roller holder. The roller holder adjustably gripped in a chamber (9) of a vertically arranged frame profile of the sliding wing over a clamping element (14) continuously in its height.
