Abstract (en)

[origin: WO2010092242A1] The present invention relates to a packaging device (10) comprising a container (1) and a cover (2), said cover (2) being hinged relative to said container (1) about a hinge pin (13), said container (1) comprising a first thread (11). Said device also comprises a first portion (3) connected to said container (1) by said hinge pin (13), said first portion being capable of blocking said container (1) when said cover (2) is in a closed position; a ring (4) freely rotatably attached onto said first portion (3), said ring (4) comprising a second thread (12) capable of engaging with said first thread (11) of said container (1) so as to screw/unscrew said cover (2).
