Abstract (en)
[origin: WO2010092058A1] The invention relates to a suction cleaning device comprising a suction apparatus (14) and a base (12) that can be moved and on which the suction apparatus (14) can be placed and from which the suction apparatus can be removed if necessary. In order to develop the suction cleaning device in such a way that accessory parts (21, 22, 23, 24, 25) can be stowed in a simple manner without this hindering the handling of the suction apparatus, it is proposed that the base comprise at least one accommodating space (61, 62, 63, 64, 72) for accessory parts of the suction apparatus.
