Abstract (en)

[origin: WO2010092117A1] The present invention relates to a process for preparing purified calcium chloride, in particular calcium chloride that is purified as regards the presence of magnesium and other metals present in the form of impurities, these impurities being precipitated by alkalization, and the precipitate is separated from the calcium chloride solution. Another subject of the present invention relates to the reuse of by-products (or residues) from known processes in the process for preparing calcium chloride initially.
