Abstract (en)
[origin: WO2010094576A1] The invention relates to a method and a device for recovering artificial turf installed on a field, the artificial turf including a backing in which fibres are inserted and one or more layers of filling particles, wherein the synthetic turf is lifted and continuously cut into strips, the strips thus cut are then raised and turned over one by one in order to drop the filling particles into a recovery container, the strips then being deposited back onto the field or rolled up.
