Abstract (en)

[origin: WO2010092311A1] The invention relates to a hot water dispensing system that comprises an accumulation tank (1) partially filled with hot water (4) pressurised by a compressed gas (5), said accumulation tank including at least: a hot water inlet (6); a hot water outlet (7) for supplying a dispensing network (8); and means (13, 11) for varying the pressure of said gas (5) in the accumulation tank (1), said means including a valve (11) in the upper portion of said tank.
