Abstract (en)
[origin: WO2010092118A1] The invention relates to an earpiece (1) comprising a first side (13) facing the ear, an acoustic transducer (2) for outputting a sound signal, and a sound guiding element (3) having a first end (14) and a second end (15). The first end (14) faces the acoustic transducer (2) and the second end (15) faces the first end (13) of the (ear-canal) earpiece (1). The sound guiding element (3) is used to guide the sound signal to an ear canal of a user. The sound guiding element (3) comprises a first opening (4) at the second end (15) of the sound guiding element. The (ear-canal) earpiece (1) also comprises at least one volume element (5), which bounds a volume and which comprises at least one second opening (6) for connecting the volume to the first end (13) of the ear-canal earpiece (1).
