Abstract (en)

[origin: WO2008064170A2] Fastening systems include one or more fastening members, sliders, stop blocks and/or top stops. Fastening members described include a variety of inventive features, including structures associated with the head portion, transition portion, and tail portion. Sliders include friction reducing structures and locking features. Stop blocks provide bottom stops for various articles, and serve to anchor a fastening member. Top stops provide a containment structure for limiting slider travel. A variety of methods are also described.
