Abstract (en)  
[origin: EP2397287A1] The convertible processing unit has a generator (10) for the generation of energy selected from the group of electrical, hydraulic, pneumatic, thermal, and radiation- and vibration energy and selected from mechanical rotation energy of a main spindle. A unit (12) is provided with energy by the generator. A detachable torque interface (14) is provided for transmitting a torque from the outer side of a coating device (1).
