Abstract (en)
An aqueous polyester resin dispersion, wherein a polyester resin having an acid value of 2 to 40 mgKOH/g and containing neopentylglycol as an alcohol component in an amount of 70 mol % or more is dispersed in an aqueous medium and a volume mean diameter is 50 nm or less, and a method of producing the aqueous polyester resin dispersion, including a dispersion step of dispersing the polyester resin together with a basic compound in an aqueous medium, wherein a rotational speed of agitation in a reaction tank is 500 rpm or less in the dispersing step.
