Abstract (en)

[origin: EP2397598A1] The locking arrangement has a feed opening, at which a door (7) is pivotally mounted by a hinge arrangement. The feed opening is arranged in a housing wall. A bolt is detachably formed at a hinge part (12) of a door ring (11), so that the hinge part of the door ring is separated from the housing-sided hinge part for mutual determination of the hinge arrangement at the feed opening.
