Abstract (en)

[origin: EP2397624A2] The system (1) has multiple similar standard panels (6) and an exchange panel (3). The exchange panel has a panel body (11) and a connecting element (12). The connection profile (13) of the exchange panel is partially formed by the connecting element. The connecting element and the panel body have corresponding locking profiles, which are mechanically locked with each other by the vertical movement of the panel body. Independent claims are also included for the following: (1) a repair kit for forming a multi-part exchange panel for the exchange of a panel of a floating floor covering; and (2) a method for exchanging a standard panel of a floating floor covering by an exchange panel.
