Abstract (en)

[origin: EP2398029A1] The switch has a universal intermediate device (5) actuated by an operating unit e.g. push button, of a universal electric functional block i.e. electric switching block. The intermediate device controls displacement of a bistable contact bridge corresponding to the functional block. The intermediate device has a molded support piece (33) locked on an upper face of the functional block, and a control unit (35) actuated by the operating unit. The intermediate device has a switching unit (36) that acts on the contact bridge.
