Abstract (en)
[origin: WO2010094328A1] The present invention relates a mop for cleaning surfaces, preferably for the wet cleaning of floors, comprising: a cover sheet (2), and one or more threads of a twisted yarn, comprising 5 to 15 fine fibre yarns per twisted yarn, fixed to the cover sheet (2) in such a way, that the threads form the cleaning active scrubbing part of the mop on the bottom side of the cover sheet, wherein the linear mass density of the fine fibres in the fine fibre yarn is in the range of 0.1 to 2.4 dtex, and the number of turns per unit length of twisted yarn is in the range of 100 to 160 T/m. The invention further relates to a method for manufacturing the mop and to a method for cleaning surfaces.
