Abstract (en)

[origin: WO2010094386A1] The invention relates to a metering device for dispensing at least one detergent and/or cleaning agent preparation (40) into the interior of a domestic appliance. Said metering device comprises at least one optical transmitter unit (92), said optical transmitter unit (92) being configured such that the transmitter unit (92) can couple signals into a cartridge (1) that can be coupled to the metering device (2) and that the transmitter unit (92) can emit signals (88b) into the surroundings of the metering device (2).
