Abstract (en)
[origin: WO2010094758A1] The present invention relates to a container assembly. According to one aspect of the invention the container assembly 1 generally comprises, a container 12 having an opening (not shown), a cap 14 having an aperture 16 and being adapted to removably engage the container for covering the opening, removable sealing means 18 for sealing the aperture 16, and a spigot 18 adapted to releasably engage delivery means extended into the aperture 16 and facilitate drawing of contents of the container 12 from the container 12. Typically the contents of the container are liquid.
