Abstract (en)

[origin: CA2790241A1] The invention relates to a method for producing a three-dimensional structure (1), which is produced substantially from plate-shaped material blanks, which material blanks are cut to size in portions from at least one material strand and then connected to one another in the form of the structure (1). The method according to the invention is distinguished by its material-saving use of the materials or building materials used.
