Abstract (en)
[origin: WO2010094866A1] The invention relates to a device for controlling a door leaf (3) of a passenger compartment, in particular of an automobile, comprising: a detection field formed on at least one active surface of the door leaf (3); a unit (5) for detecting a gesture of a user on said active surface; and an interpretation module (7) for generating a command relating to the door leaf (3) and associated with the detected gesture.
