Abstract (en)  
[origin: WO2010095162A1] A support unit (1) for a continuous facade, wherein a coupling member (12) is shaped so as to support in a hinged manner at least one interface member (122) around a pivot axis (14); a blocking device (40) being provided to fix each interface member (122) in a rigid manner to the coupling member (12) according to a given angle (a) of inclination; the blocking device (40) comprising at least one plug (42) and one corresponding pair of first and second holes (44) (46) respectively obtained in the coupling member (12) and in one interface member (122) to house the plug (42), in order to block in a rigid manner the corresponding interface member (122) to the coupling member (12) according to the given angle (a).
