Abstract (en)

The present invention relates to a laminar flow cabin (1) of the type comprising an operating plane (4) supported by a lower box portion (2) and surmounted by a plenum or upper box portion (3), and provided with a transparent protective front panel (5) movable between a completely lowered position and a completely raised position, further comprising air intake means (2a) able to convey said laminar air flow, wherein it comprises means for movement (10) of said operating plane (4), which is thus movable in the vertical direction relative to said lower box portion (2).
