Abstract (en)  
[origin: EP2399844A1] The support frame (10) has a cup receiving opening enclosed by a support panel (20). The receiving opening has an apparatus which is adaptable to a cup diameter for supporting a cup. A base plate (16) is provided, in which two side walls (12,14) are pivotally mounted. The base plate is designed such that the base plate supports a cup adjusted in the receiving opening. An independent claim is also included for a beverage providing method.
