Abstract (en)
[origin: EP2400105A1] A mosquito net (1) is described which is mobile between a completely open position and a completely closed position for openings (2) comprising arc portions (11), undercuts, bevellings or similars, comprising a net (100) having a fixed extremity (9) integer to a first portion (8) of a frame (10) delimiting said opening (2) and a mobile extremity (5) associated to a mobile hollow vertical upright (3) slidingly associated to a first guide (13) and housing a rod (14) vertically slidable whose superior extremity (15) is slidingly associated to a second guide (16) and supports a tensioning cable (21) suitable to run inside said mobile upright (3) and inside said second guide (16) until it attaches itself to a compensating spring (25) whose fixed extremity is integer to a second portion (12) of the frame (10). (Fig.4).
