Abstract (en)  
[origin: EP2400478A2] The device (10) has a display segment (12), a reflector body (14), an elastic coupling element (16), and a printed circuit board (18) with an LED (20). A channel (22) is arranged between the display segment and the LED, where the channel guides light in the reflector body. The coupling element is arranged between the display segment and the printed circuit board, and a light guide (24) is arranged in the channel for guiding the light, where the coupling element and the reflector body are opaque, and the light guide is optically diffused.
