Abstract (en)

[origin: WO2010097539A1] The invention relates to a spraying apparatus (P) comprising: a body (2); a spraying member (1) supported by said body (2); and several electrodes (31-38) arranged around the spraying member (1). The spraying apparatus (P) further includes hinge means (41-48) for hinging all or part of the electrodes (31-38) relative to the body (2). The electrodes (31-38) are mobile between a compact configuration, in which the electrodes (31-38) together occupy a first space (V4), and at least one expanded configuration, in which the electrodes (31-38) together occupy a second space (V1), the first space (V4) being smaller than the second space (V1).
