Abstract (en)  
[origin: WO2010097473A1] The invention relates to a light for a vehicle having a contiguous reflector (3) having a plurality of reflector surface regions (A1, A2, B) and a first light source (1) that is arranged such that the light emission thereof is reflected by a first region (A1, B) of the reflector surface of the reflector (3). The light according to the invention is characterized in that the reflector (3) has an opening (5) and there is a second light source that is arranged behind a part (4) of the reflector (3) relative to the light emission direction (L) of the light and the light emission thereof hits a second region (A2) of the reflector surface of the reflector (3) through the opening (5) and is there reflected.
