Abstract (en)
[origin: GB2468154A] A method of displaying an image of graphical information 100b,c on a net used for sport, e.g. a football goal net, comprises the steps of obtaining a sheet of material 301 on which graphical information 100b,c is provided, and attaching the sheet of material to the net 101. At least one camera (105, 150, Fig. 1) is located such that the graphical information is viewable by the camera, and configured to capture an image which may be viewed on a television. The net comprises strands defining substantially polygonal holes and the sheet is configured to be attached to the net such that the graphical information is contained within one of the holes. A clipping device (Fig. 4) is provided to attach the sheet of material to the net. The graphical information is preferably an advertisement comprising a logo and/or word mark.
