Abstract (en)  
[origin: WO2010097163A1] The invention relates to an electric heater (22) having at least one substantially cylindrical carrier (12) and having at least one heating circuit (26) applied to the carrier (12) comprising substantially straight heating circuit segments (28) and substantially curved heating circuit segments (30) defining turning points, wherein the straight heating circuit segments (30) together form at least one meandering heating circuit arrangement (40, 50). Adjacent straight heating circuit segments (28) are disposed at a prescribed angle  $\alpha$  to each other.
