Abstract (en)  
The jacket has two combustion chamber external jacket parts (10, 15) joined by a detachable connection i.e. flange connection (60), in gas-tight manner, where the jacket is implemented as a double piece in the external jacket parts. The flange connection is formed in a screwed manner, where the jacket is provided with heat shields (5, 6) in an axial direction (A). A connection is provided between the heat shields in the axial direction. A nozzle guide vane carrier (30) is arranged downstream to the jacket in the axial direction, and the heat shields are arranged at same or different distances.

Abstract (de)  
Die Erfindung betrifft eine Brennkammeraußenschale für eine Gasturbine, wobei die Brennkammeraußenschale in ein erstes Brennkammeraußenschalenteil (15) und in ein zweites Brennkammeraußenschalenteil (10) zweiteilig ausgeführt ist, welche durch eine lösbare Verbindung gasdicht zusammengefügt sind.
