Abstract (en)
[origin: WO2010101486A2] An ergonomic support for reading documents or books, designed in particular for working at a computer work station or in a reading room, for mounting on computer screen risers (monitor holders, platforms, supports), desks, tables, shelves, bookshelves, cabinets and other furniture. The support is made in the form of a mobile pulpit (3) connected so as to enable sliding and rotational motion through at least one positioning element (6) with at least one mobile element of the mounting guide (5). The positioning element (6) is set onto the mobile element of the pulpit guide (9). Set into the mobile element of the pulpit guide (9) is a regulator of pulpit elevation (8), which determines the elevation of the mobile pulpit (3) which acts together with the positioning element (6).
