Abstract (en)
[origin: WO2010101458A1] A shipping package for research substances, provided with two tray parts movable with respect to each other for enclosing the research substances, wherein the package in closed condition is relatively flat, wherein the tray parts are relatively stiff for protecting any substances in the package, and a closure which surrounds both tray parts along at least a large part of the circumference, for holding the tray parts against each other and at least moisture-tightly closing off the package at an inner pressure of at least approximately 0.95 bar.
