Abstract (en)
[origin: WO2010100073A1] The invention relates to an abrasive point for machining work pieces made of metal, in particular of cast metal, having a base body with a grinding region effective on the outer surface for grinding the work piece and a shaft for clamping the tool in the collet chuck of a machine, wherein the base body is produced from metal and wherein the outer surface of the base body has abrasive particles that are held on said surface in a firmly bonded manner.
