Abstract (en)

[origin: CA2753452A1] The invention relates to a device for attaching façade elements using support profiles (12) comprising a tape-like center segment (13) on which anchor elements (18) for receiving the façade elements are provided symmetrically to the longitudinal axis (14) of the support profile (12), wherein the anchor elements (18) comprise an embossment (16), the embossment is provided at least in the area of the retaining bar (20), and the outer edge (25) of the embossment (16) extends in the retaining bar (20) not parallel to the outer edge (21) of the retaining bar (20).
