Abstract (en)

[origin: WO2010100340A1] The invention relates to a method for displaying a webpage on a communication terminal, the webpage corresponding to a data stream received by the terminal, referred to as an initial stream. The method comprises the following steps: intercepting (66) the initial stream received by the terminal (10); searching (68, 70, 72), in said initial stream, for data related to a product referenced in a database (16), this data being referred to as initial data; inserting (82) complementary data from the database (16) into the initial stream, said complementary data being associated with the initial data in the database (16); and displaying (84, 86) the thus-modified stream on the terminal (10).
