Abstract (en)

[origin: WO2010101958A2] According to one or more embodiments, media objects are published on publisher resources. In one embodiment, a web resource is provided on a network having a first domain or location. Responsive to a terminal accessing the first location to render the web resource, a search parameter is signaled to a search engine that operates at a second location or domain on the network. A search response is received that includes media object data. The media object data identifies one or more galleries of media objects. The media object data may be used include at least a portion of a gallery of media objects as part of the web resource that is rendered for the terminal.
