Abstract (en)
[origin: EP2405095A2] The sealing system has a door seal (1) including a housing (10). A fixing element (2) has a bracket for attaching an end region of the housing at a door leaf. The housing is projected into an end region of the bracket, which has a hole for attaching a screw or a pin. Another bracket is retained on the housing. The brackets are arranged at right angle with respect to each other. The latter bracket has upper and lower holders, where a housing wall (101) is retained between the holders, which parallelly run with respect to each other.
