Abstract (en)

[origin: WO2010103232A1] The invention relates to an adhesive marking device (1) comprising a carrier film (2) made of a synthetic material and carrying on a first surface, referred to as an upper surface, at least one marking pattern (5) covered with a varnish protection layer (6) and on a second surface opposite to the first one, referred to as a lower surface, a pressure-sensitive adhesive layer (3) protected by a protection sheet (4), characterised in that the carrier film (2) is a polyester film having a thickness of between 20 and 50 µm and has two surfaces with a roughened surface state. The invention also relates to a method for making such a marking device.
