Abstract (en)
[origin: WO2010104812A1] An article carrier for packaging at least one article includes at least one top panel (12) and at least one bottom panel (34, 36) interconnected by a pair of first (24) and second (22) side panels to provide a generally tubular structure, and a sloping heel panel (28) disposed between the at least one bottom panel and the first side panel. The sloping heel panel (28) is provided with at least one bottom receiving opening (100). The carrier further includes a first winglet panel (102) formed at least in part from part of the sloping heel panel. The first winglet panel (102) is defined by the at least one bottom-receiving opening (100) and a first expansion slit (110) in the sloping heel panel. The first expansion slit extends from the sloping heel panel into the first side panel (24).
