Abstract (en)
[origin: WO2010102631A1] Method for manufacturing of masterbatches by converting colorants into a solid substance, e.g. a granulate, for plastic manufacture. Compounds to be mixed include carrier polymer (SBS-elastomer), color and an oil (ABTC or Citrofol B2). Use is made of a mechanism where the polymer is caused to swell. The color may be solid, liquid or gelatinous.
