Abstract (en)

[origin: WO2010103128A1] The invention relates to a gabion including panels (1) consisting of metal meshes that can be assembled so as to form a casing for receiving a bulk of filler material such as pebbles, natural rock fragments, wood chips, or the like and/or a mixture of said materials, wherein said gabion is characterised in that it comprises at least one flexible sealed pouch (7) provided with gripping means (10) and capable of being inserted between assembled panels (1).
