Abstract (en)
[origin: GB2468527A] Apparatus 10 for storing or transporting a valuable item 16, the apparatus comprising a security container 12 and a sealable bag 14 having a container 18 containing a degrading agent or a component of a degrading agent, which sealable bag can be received in the security container, wherein the apparatus comprises a degrading mechanism 20 which is configured to breach the container 18 of the sealable bag so as to release the degrading agent or component into the sealable bag. The degrading mechanism may dispense degrading agent or the first part of a multi-part degrading agent into the bag by means of a hollow needle into the bag and the bag may contain the second part of a multi-part degrading agent. The degrading mechanism may comprise a source of pressured gas and / or a pyrotechnic device. The sealable bag may be removable and resealable.
