Abstract (en)
[origin: WO2010094446A1] What is described is the use of a metal hollow profile bar which comprises an outer wall (2), an inner wall (5) opposite the outer wall, and two flanks (3, 4) which are parallel to one another, wherein the inner wall (5) and the outer wall (2) are narrower than the hollow profile bar. According to the invention, it is provided for the production of a frame-shaped spacer for insulating glass panes.
