Abstract (en)
[origin: WO2010103184A1] The invention relates to equipment for dwelling-specific ventilation in a decentralized ventilation system. The equipment comprises a ventilation machine for supplying supply air into rooms or groups of rooms of a dwelling. In accordance with the invention, the equipment comprises two or more supply air main lines for supplying supply air into rooms or groups of rooms of the dwelling, and control means for controlling supply air flow of the supply air supplied to each supply air main line according to the need and independently of the other supply air main lines.
