Abstract (en)
[origin: WO2010102354A2] Mounting system for mounting a flexible information carrier, comprising: - first guide means extending substantially between the left and right-hand bottom corner for the purpose of guiding a bottom side of the information carrier; - second guide means extending substantially between the left-hand bottom corner and the right-hand top corner for the purpose of guiding a top side and a left-hand side of the information carrier; - a side profile with an upper end which can be guided in the second guide means substantially from the left-hand bottom corner to the right-hand top corner, and with a lower end which can be guided along the first guide means and can be uncoupled.
