Abstract (en)

[origin: WO2010102659A1] The invention relates to a winding arrangement for a transformer or for a throttle, having an annular winding cover part (6) disposed on the front face of a winding (5), wherein a side surface (22) of the winding cover part (6) overlaps a front surface (10) of the winding (5), wherein the annular winding cover part (6) is designed to be magnetically conductive at least in a partial area (21) and comprises a convex side surface (23) facing away from the winding (5).
