Abstract (en)

[origin: EP2407389A1] An arrangement for packing at least one article in a container comprises an automatic picking list generation means (136) generating a picking list (138) which specifies at least the at least one article to be placed in the container; closing means (142) for closing the container; and inflating means (146) for inflating a dunnage bag provided in the closed container. The invention proposes that the arrangement further comprises automatic bag type selection means (134) for selecting a type of the inflatable dunnage bag to be used, the selection depending at least on a parameter of the container.
