Abstract (en)

A scaffold (14) for work on a sloping roof surface (2) of a building comprises a scaffold part from which a ramp (11) extends. The ramp extends over at least a part of the roof surface to form a safe pathway for a worker. The ramp comprises at least close to an outer end coupling means (141) with which the ramp, at least during use, can be coupled for substantially horizontal displacement to the scaffold part.
