Abstract (en)

[origin: EP2407627A2] The present invention relates to a seal gasket (G) for doors and windows provided with elastically deformable monolithic structure obtained from extrusion of thermoplastic materials, provided on the front of a strip (2) adapted to adhere to the door or window with a tubular section (1) with basically horseshoe cross-section, wherein the rounded front end (3), which is basically semicircular, is joined in the back with two rectilinear sides (4) that are symmetrically opposite and converge towards said strip (2).
