Abstract (en)

[origin: EP2407746A2] The equipment has a coupling element (6) provided between two supports (3, 4). Ballistic protection bars (2) are pressure-decoupled or train-coupled connected with one another over an outer surface (5) of the equipment. The protection bars are pulled by back springs over the coupling element at the outer surface. LED ends of the coupling element are provided with a behind grip and inserted into an aperture of the protection bars. A damping element is placed opposite to a protection element.
