Abstract (en)

[origin: WO2010105970A2] The invention relates to an aqueous composition comprising a) a suspended pesticide that is soluble in water at 20 °C at 10 g/l at maximum, b) a salt and c) a protective colloid that is a polysaccharide substituted with C3-C32-alkylcarbonyl and/or C3-C32-Alkylcarbamoyl groups. The invention further relates to a method for producing said composition in that a) the pesticide, b) a salt and c) the protective colloid are brought into contact with one another. The invention furthermore relates to a use of salt for slowing particle growth in an aqueous composition comprising said suspended pesticide, and the protective colloid.
